

# Smart applications for smarter cities: How the ICT platform "City on Cloud" is making the Turkish city of Tepebasi greener?

This project is funded by the European Union's Horizon 2020 research and innovation programme under grant agreement No 646511.

[www.remourban.eu](http://www.remourban.eu)

**IMPORTANT NOTICE:**  
**This webinar will be recorded and uploaded to REMOURBAN's website and YouTube channel.**

Do you want to know more about this project and the opportunities that it holds for you and your organization?

# Agenda

## INTRODUCTION

*Fernando Barrientos: Project Consultant, Steinbeis-Europa-Zentrum*

Introductory words on the Project REMOURBAN and this webinar.

## PART #1 - OVERALL CONNECTION BETWEEN REMOURBAN AND THE ICT PLATFORM IMPLEMENTED IN TEPEBASI

*Caner Demir: Consultant, Demir Enerji*

Insights into REMOURBAN's urban regeneration model and how energy, mobility and ICT can converge.

## PART #2 - WHY IS TEPEBASI STRENGTHENING ITS ICT INFRASTRUCTURE?

*Murat Aksu: Project Manager, Tepebasi Municipality*

The importance of integrated ICT infrastructures for sustainable Municipalities.

## PART #3 - HOW DOES "CITY ON CLOUD" MEET TEPEBASI'S DEMAND?

*Murat Karabatur: Head of Mobile Solutions, Olcsan Technology*

Delivery of energy and mobility data required by Tepebasi. Some notes on a smart lighting App.

## QUESTIONS & ANSWERS

## PART #1

# OVERALL CONNECTION BETWEEN REMOURBAN AND THE ICT PLATFORM IMPLEMENTED IN TEPEBASI

# World Population Increasing

## World Population

1900 1.7B

1950 3.5B

Today 7.5B

2050 9.7B

# Resources Decreasing

## NATURAL RESOURCES DECREASING

Needed for 2050

Food **+60%**

Water **+55%**

Energy **+80%**

# Urban Population is Increasing

## Urban Population

1900 13%

1950 29%

EU 78%

Today 54%

US 82%

2050 66%

# City Challenges

- Energy
- Building
- Transportation
- Environment
- Technology
- Public Health
- Infrastructure (water, waste, communication etc)
- Governance
- Participatory processes

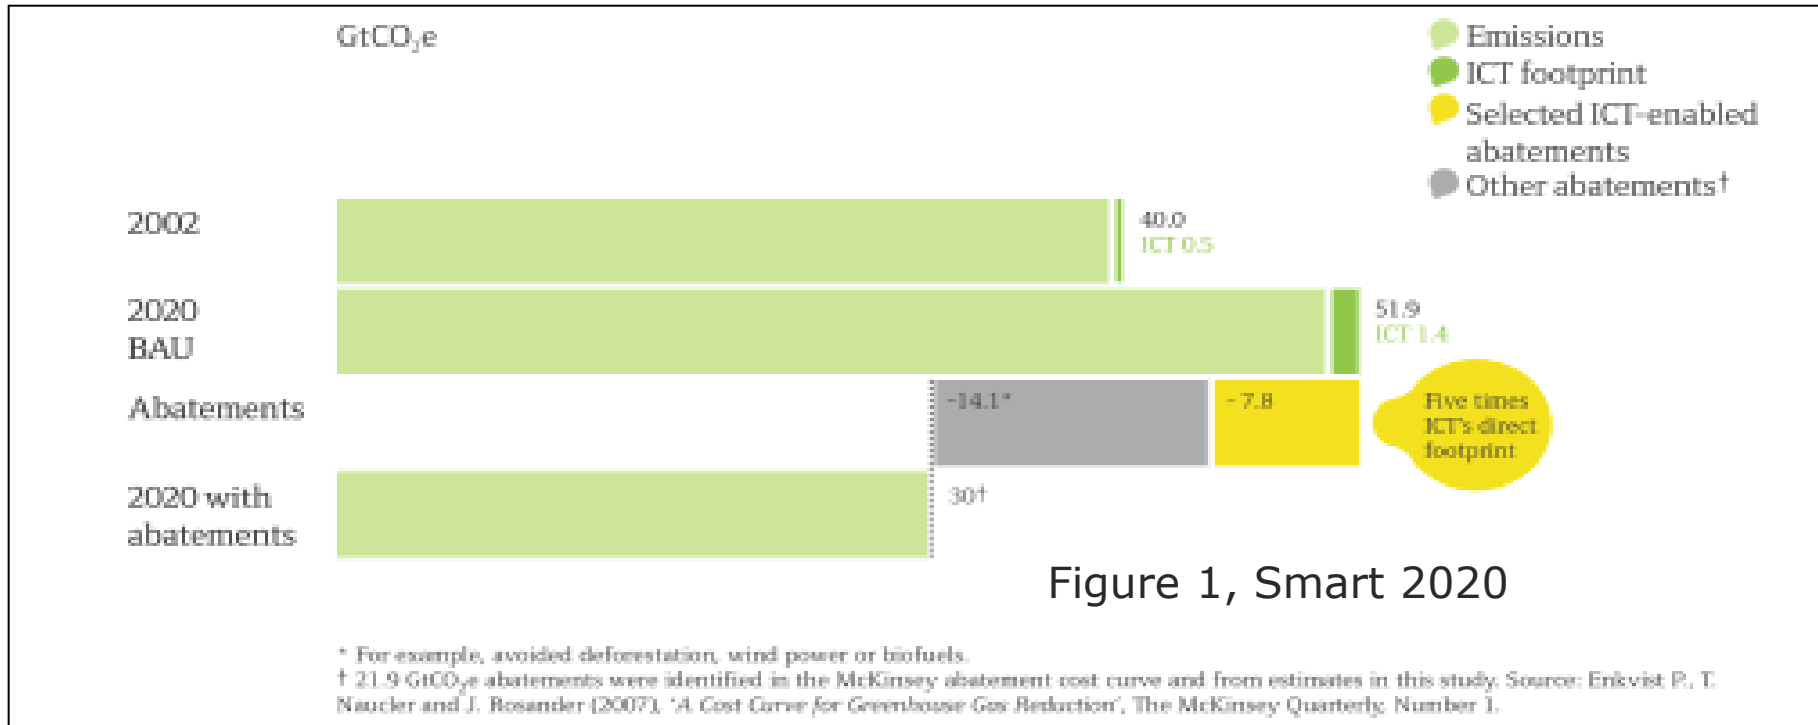

# ICT Enabled

SMART 2020  
Report (2008)

## ICT Impact: The Global Footprint and the Enabling Effect

# ICT Enabled Impact

**GeSI**  
GLOBAL e-SUSTAINABILITY  
INITIATIVE

**BCG**  
THE BOSTON CONSULTING GROUP

Fig. 8 ICT: The enabling effect

GtCO<sub>2</sub>e

7.8 GtCO<sub>2</sub>e of ICT-enabled abatements are possible out of the total BAU emissions in 2020 (51.9 GtCO<sub>2</sub>e)

The SMART opportunities including dematerialisation were analysed in depth

- Industry**
  - Smart motors
  - Industrial process automation
  - Dematerialisation\* (reduce production of DVDs, paper)
- Transport**
  - Smart logistics
  - Private transport optimisation
  - Dematerialisation (e-commerce, videoconferencing, teleworking)
  - Efficient vehicles (plug-ins and smart cars)
  - Traffic flow monitoring, planning and simulation
- Buildings**
  - Smart logistics†
  - Smart buildings
  - Dematerialisation (teleworking)
  - Smart grid‡
- Power**
  - Smart grid
  - Efficient generation of power, combined heat and power (CHP)

\*Dematerialisation breaks down into all sectors except power. See detailed assumptions in Appendix 3.  
 †Reduces warehousing space needed through reduction in inventory. See Appendix 3.  
 ‡Reduces energy used in the home through behaviour change. See Appendix 3.

# Smart Cities and Communities

2014

## GROWSMARTER

Köln, Barcelona, Stockholm & Graz, Cork, Valletta, Porto, Suceava

## REMOURBAN

Valladolid, Tepebasi, Nottingham & Seraing, Miskolc

## TRIANGULUM

Eindhoven, Stavanger, Manchester & Prague, Leipzig, Sabadell

2015

## REPLICATE

San Sebastián/Donostia, Firenze, Bristol & Lausanne, Essen, Nilufer

## SHAR-LLM

Milano, Lisboa, London (Greenwich) & Burgas, Bordeaux, Warsaw

## SMARTENCITY

Sønderborg, Tartu, Vitoria/Gasteiz & Asenovgrad, Lecce

## SMARTER TOGETHER

Wien, München, Lyon & Sofia, Santiago de Compostela, Venezia, Yokohama, Kiev

2016

## mySMARTlife

Hamburg, Helsinki, Nantes & Varna, Palencia, Rijeka, Bydgoszcz

## RUGGEDISED

Rotterdam, Umea, Glasgow & Brno, Parma, Gdansk

2017

## STARDUST

Pamplona, Tampere, Trento & Cluj-Napoca, Derry, Kozani, Litoměřice

## IRIS

Utrecht, Göteborg, Nice Côte d'Azur & Vaasa, Alexandroupolis, Santa Cruz de Tenerife, Focsani

## MatchUP

Valencia, Dresden, Antalya & Ostend, Herzliya, Skopje, Kerava

14 June 2019

# Project consortium

Kick-off meeting | Valladolid | 17-19 February 2015

# Remourban Priority Areas

## REMOURBAN and the SIP Priority Areas

### Sustainable Urban Mobility

Innovation on electromobility and recharge infrastructure for Electric Vehicles

### Sustainable Districts & Built Environment

Innovation on buildings and district retrofitting and generation and distribution facilities

### Integrated Infrastructures and Processes

Innovation on distributed electricity generation and management and ICTs for integrated infrastructures

### Non-technical actions / Enablers

Innovation on non-technical barriers, citizen engagement strategies and financial schemes

**PART #2**  
**WHY IS TEPEBASI**  
**STRENGTHENING**  
**ITS ICT**  
**INFRASTRUCTURE?**

# Tepebaşı

## Tepebaşı

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 646511

# Manifesto

## THE LIGHTHOUSE PROJECTS COOPERATION MANIFESTO

Shaping the market of Smart Cities in Europe through the cooperation of European lighthouse projects

and sign this Lighthouse Projects Cooperation Manifesto in the Lighthouse City of Nottingham, on March 23rd of 2017

In representation of the signature hosting city

Cllr Sam WEBSTER  
Employment and Skills

NOTTINGHAM  
TRENT UNIVERSITY

Pro Vice-Chancellor Michael CARR  
Employment & Economic Engagement

In representation of the lighthouse projects

Mr Miguel A. GARCÍA-FUENTES  
REMO URBAN Project  
Coordinator

Chair of the SCOT Board of Coordinators at the time of the signature

Mr Damian WAGNER  
TRIANGULUM Project  
Coordinator

Mrs Lisa ENARSSON  
on behalf of GrowSmarter  
Project Coordinator

Mr Francisco RODRIGUEZ  
SmartEnCity Project  
Coordinator

Mr Nathan PIERCE  
Sharing Cities Project  
Coordinator

Mrs Elisabeth JORGE  
REPLICATE Project  
Coordinator

Mr Maxime VALENTIN  
Smarter Together Project  
Coordinator

Mr Rubén GARCÍA-PAJARES  
mySMARTLife Project  
Coordinator

Mr Albert ENGELS  
RUGGEDISED Project  
Coordinator

The Smart Cities and Communities lighthouse projects are funded by the European Commission Research and Innovation Framework Horizon 2020 and managed by the Innovation and Networks Executive Agency INEA.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 646511

All in one

14 June 2019

**PART #3**  
**HOW DOES "CITY ON CLOUD" MEET TEPEBASI'S DEMAND?**

# CITY ON CLOUD

"If you can't measure it, you can't improve it."

Peter Drucker

# Smart City Information Platform – City on Cloud

The City Information Platform of Tepebaşı is collecting, tracking and processing the whole set of variables being monitored in Tepebaşı

# City on Cloud – Platform of Platforms

CoC collects data from multiple platforms and systems and provides the user one platform to control and track all of the important data

- Building Energy Management System
- Energy Monitoring System for Electric Meters
- Solar Panel System
- Vehicle Tracking System
- E-Bike Management System
- Smart Street Lighting System

# Olcsan Smart City Platform – City On Cloud

**City On Cloud**

# City On Cloud – Operation Map

The screenshot displays the 'City On Cloud' web application interface. On the left is a navigation sidebar with the following menu items: Dashboard, Building (highlighted in blue), Map, Heat Meter, Electricity Meter, Transportation, E-Bike, Lighting, Heating Center, Solar Panel System, Excel Import, Measurement, Reports, and Definition. The main content area is titled 'Building' and shows a satellite map of a residential neighborhood. A red rectangular bounding box highlights a specific building complex, and several blue cloud icons are overlaid on the buildings within this area. The map interface includes a 'Map' and 'Satellite' toggle, a zoom control (+/-), and a full-screen button. At the bottom of the map area, there is a copyright notice: '2017 © ÖLÇSAN CAD TEKNOLOJİLERİ. Privacy Terms Help'. The top right corner of the application features flags for language selection, a search icon, and other utility icons.

# Energy Monitoring

- A Building Management System (BMS) takes care of three main subjects
  - Energy Monitoring
  - Thermal Comfort
  - HVAC Controls
- CoC collects the raw data from the BMS via Modbus over TCP/IP
- CoC processes the raw data to calculate the important energy indicators

# Energy Monitoring for Electric Meters

- Dashboard
- Building**

Jun 2019

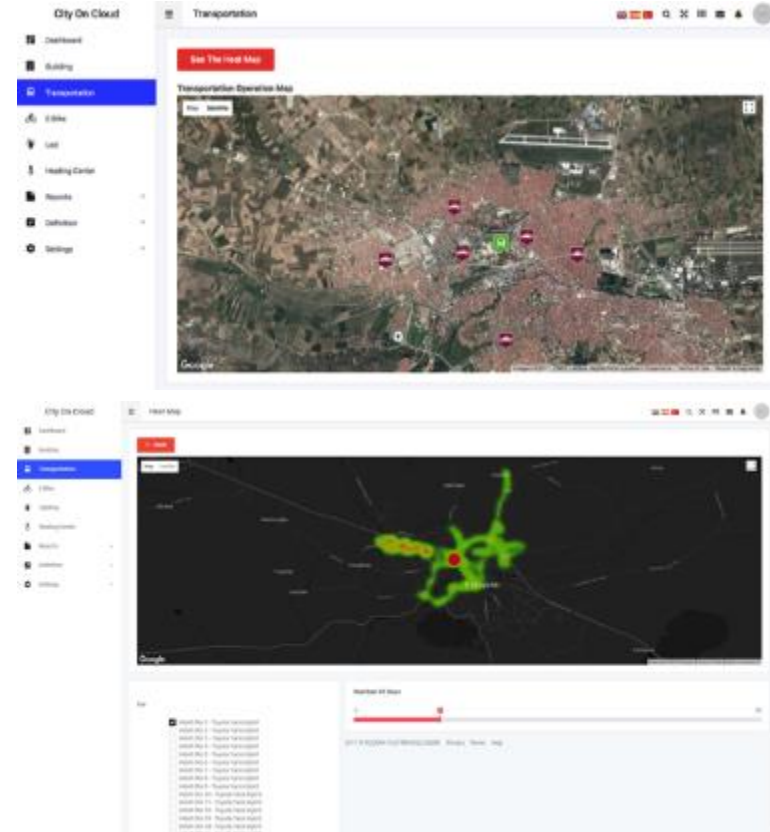

# Sustainable Mobility with e-bus, e-bikes & hybrid cars

# Fleet Management System Integration

- CoC is connected to a fleet management system to track e-buses and cars
- The speed, odometer value of the car and other info about the car is shown on platform
- The location of the vehicles is shown on the map and it is possible to see the history of the places visited by each vehicle as a heat map
- For the e-buses the battery charge level and consumption information can be also tracked

# E-bus Charging Station

# E-bike Rental & Charging Stations

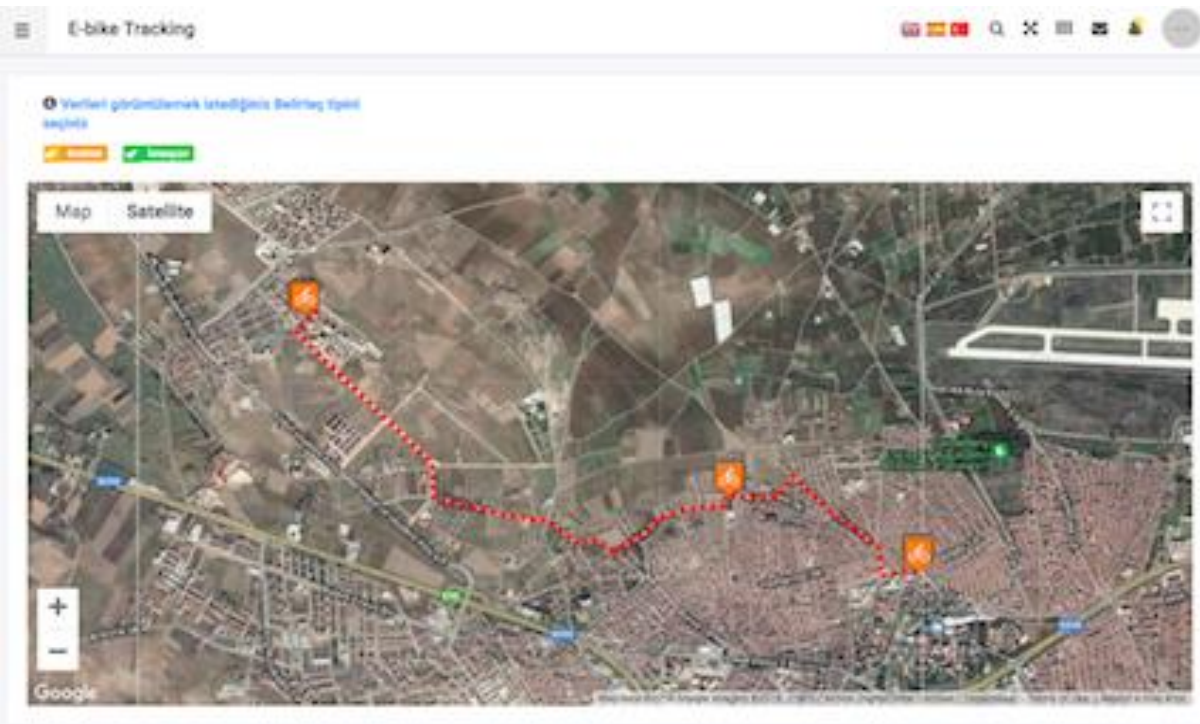

# E-bike monitoring on City on Cloud

- E-bike rental system deployed at Tepebaşı, consists of 30 e-bikes, 3 e-bike rental locations with 15 corresponding docking stations
- 3 rental locations for e-bikes located at:

Yaşam Köyü (demo site)

Yunus Emre Spor

Anadolu University

# Smart Streetlight Implementation

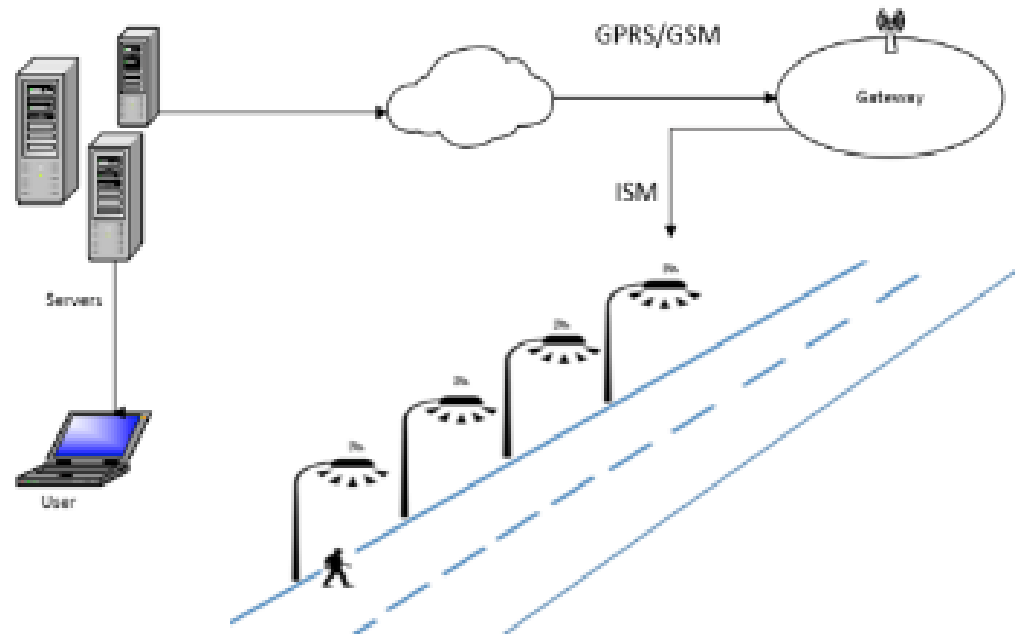

# Olcsan Smart Lighting Solution

- The intelligent lighting is performed by using AGASY, a smart lighting solution provided by OLC
- 44 25W lamps are controlled by the system
- It supports 3 different modes: Manual, Schedule-Based and Sensor-Dependent Mode

# Advantages of LEDs

- Very quick start-up time
- High color temperature (CT); improves driver peripheral vision
- Long lifespan (LEDs last 15-20 years)
- Twice as energy efficient as fluorescent lighting
- Safer and more efficient in colder environments
- Highly shock-resistant (ideal for locations with vibrations, e.g. bridges)
- Relatively smaller carbon footprint and recyclable

## Downsides to LEDs

- Whiter-looking light suppresses melatonin production
  - LEDs suppress melatonin production five times more than HPS light does
- LEDs produce far more blue light, which scatters more than red and yellow light do and causes retinal damage
- Have to invest exclusively in higher-tier LED products
- Complaints include light pollution (i.e. glare, light trespass, etc.)

# Why Smart Street Lighting

- Improve citizens' satisfaction
  - Security, safety, and wellbeing
- Savings
  - Less power consumption
  - Lighting system maintenance
- Lighting infrastructure as a backbone for IoT applications
  - Monitoring changes in weather, pollution rates
  - Mapping traffic conditions and flow

## Questions & Answers

## **Upcoming Webinar:**

**“The Integrated Urban Plan: methodology for the design of a sustainable urban development strategy for European cities”**

**June 19th, 2019 at 14:00h (UTC+2)**
