

Dr. **Jorge Núñez Ferrer** is an independent economist and consultant and Associate Research fellow at the Centre for European Policy Studies (CEPS) and holds a PhD from Imperial College London. He is specialised in EU budgetary and financial instruments. After starting his career as a researcher at CEPS, he joined the European Commission's Economic and Financial Affairs Directorate General from 2000-2004 as EU budget evaluator, before re-joining the research and consultancy areas. Between 2010 and 2012 he chaired the Finance Group of the Smart Cities and Communities Stakeholder Platform of the EU and was one of the overall coordinators platform. He has been project partner leader for the International Electrotechnical Commission (IEC) in drafting their white “Orchestrating infrastructure for sustainable Smart Cities” of December 2014. Since January 2015 he is part of the consortium management team of the new EU’s Smart Cities and Communities Information System (SCIS). Recently, he joined the scientific advisory group of the REMOURBAN lighthouse project. He is a specialist in EU budgetary programmes and finances and is presently the project leader of the group drafting the report on the Own Resources of the EU for the High Level Group lead by former Italian Prime Minister Mario Monty. He is also visiting lecturer at the Central European University in Budapest.
